Emissions reduction targets

AGB Pharma (UK) is committed to a 5% reduction in baseline emissions between the years 2023 and 2024. This however will be dependent on stock required, to fulfil NHS needs in the potential growing marketplace for our current medicines, along with any new medicines we launch in 2024 and future years.

We project that carbon emissions will decrease over the next five years to 0.56 tCO₂e by 2028. This is a reduction of 29%.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects will be initiated throughout 2024 and will continue through the lifetime of the commitment to net zero, along with new initiatives when required:

Look at carbon offset activities ie Ecologi
Use greener transport both up and down stream i.e. solar powered, biofuel
Increase monitoring of impact to environment, and act accordingly
